

**MAROT & WALTER'S**  
**ALMANACK,**  
**FOR THE YEAR OF OUR LORD,**  
**1826,**

*Being the second after Bissextile, or Leap Year,*

AND THE  
50th & 51st, of AMERICAN INDEPENDENCE.

---

CALCULATED BY JOSHUA SHARP.

---

*Time, in advance, behind him 'hides his wings,  
And seems to creep, decrepid with his age;  
Behold him, when past by; what then is seen  
But his broad pinions swifter than the winds?  
And all mankind, in contradiction strong,  
Rueful aghast! cry out on his career.*

## NOTES TO THE READER.

*First.* The calculations of this Almanac are made to solar or apparent time; to which add the equation, when the sun is slow, and subtract when fast, for the mean or clock time.

*Second.* As the day ends at midnight, the rising, setting and southing of the Moon, when after that time, is found against the succeeding day; so on the night of (or following) the 3d day of the 1st month (January) the moon rises at 3h. 21m. after midnight, viz. in the morning of the 4th, not at 2h. 15m. the time opposite the 3d, which is that of its rising the preceding morning.

*Third.* The rising, setting or southing of a star may be carried several days backwards by adding, or forwards by subtracting 4 m. per day; For instance, on the 12th day of January, Sirius is south at 11h. 00m. adding 12m. for three days sooner, we have 11h. 12m. for the southing on the 9th, and by deducting 8m. for 2 days later, leaves 10h. 52m. for the southing on the 14th of the same month, &c.

*Fourth.* The time of High Water at Philadelphia is so computed as to serve for either morning or evening, (near enough for common use) the morning flood being about 12m. earlier than the time in the tide column, and that of the evening as much later.

### *Solar and Lunar Eclipses, in the year 1826.*

1st. Of the Moon, on the 21st day of the 5th month, (May,) at 15m. past 10 h. in the morning, invisible.

2d. Of the Sun, on the 5th day of the 6th month, (June,) at 51 m. past noon, invisible, by reason of the moon's south latitude.

3d. Of the Sun, on the 30th day of the 10th month, (October,) at 8h 20m in the evening, also invisible.

4th. Of the Moon, on the 14th day of the 11th month, (November,) at 11h. 8m. in the morning, invisible.

5th. Of the Sun, on the 29th of the 11th month (November,) at 6h. 5m. in the morning, invisible.

Venus (♀) will be morning star until the 10th of the 3d month (March,) then evening star to the 23d of the 12th month (December,) then it becomes morning star again to the end of the year.

To preserve Bacon.—*A writer recommends the following method as effectual in preserving bacon and smoked beef from insects. Make a lie of wood ashes, and boil it till it is very strong. Dip each piece of the meat in it, let it dry, and hang in a smoke house; and no insect will injure it, and the taste of the lie will not be perceived, even on the outside.*

The ANATOMY of MAN'S BODY, as supposed to be governed by the Twelve Constellations

To know where the sign is. Find the day of the month, and in the seventh column the sign the moon is in; then finding the sign here, it shows the part of the body it is supposed to govern.

*Characters showing the time to Plant and Sow.*

☽ Moon Ascending ——— ☾ Moon Descending.

N. B. It is said, when you want to gather the fruit above the Earth, the best time to plant and sow seed and grain is, when the moon is ascending. But when you wish to gather it in the ground, the best time to plant and sow, is when the moon is descending.

New York evacuated, November 25, seventeen hundred and eighty three.

The American army disbanded; General Washington resigns his commission, December, seventeen hundred and eighty-three

Constitution adopted, Sept. seventeen hundred and eighty seven.

*Pulmonary Consumption.*—The Boston Medical Intelligencer contains an account of a new mode of treatment for consumption and other diseases of the lungs, invented by Dr. Middleton, a distinguished English physician. Being himself affected with a disorder of the lungs and having lost two promising children by pulmonary consumption, he directed his whole attention and studies to those diseases. All his other professional business was given up, and his investigations gave rise to the mode of treatment, which he is now communicating to the world gratuitously.

His theory is founded upon the absorbing power of the lungs, which is so great, that he states the lungs of a sheep will take up four ounces of water, injected by an aperture in the windpipe, in the course of a few hours without occasioning any apparent suffering.—Medicines, in substance or in a fluid state, as Dr. Middleton has proved by a variety of experiments, are carried into the circulation much sooner when thrown into the lungs than into the stomach. Dr. Middleton's plan then is, instead of loading the stomach with drugs and debilitating the whole system for the cure of a local disease, to administer it directly upon the lungs, and supply the stomach with a generous though not too stimulating diet. The medicines to be employed are calcined sponge, dandelion or stramonium for tubercles on the lungs, and myrrh and bark in more advanced stages of disease. These are administered by means of an instrument called an *inhaler*, which is a block-tin case, in which is a cylindrical wheel having bristles inserted in its sides, and turned by a crank on the outside. At the top is a mouth piece which conveys the preparation to the lungs. The substance to be inhaled is first reduced to an impalpable powder, and being put into the inhaler, is set afloat by the wheel.—When the air of the box is sufficiently loaded, the patient closes the nostrils, while he makes a full inspiration from the mouth pieces of the inhaler, by which the powder is conveyed to the seat of the disease.—This is repeated three or four times a day. The success that has attended Dr. M's. own practice has demonstrated the superiority of the system to any other heretofore practised upon. He considers consumption a contagious disease, and cautions persons against inhaling the breath of those who are laboring under infections of the lungs.

*A man of few words.*—A young man, some short time back, arrived at an inn, and after alighting from his horse, went into the travellers' room, where he walked backwards and forwards

for a few minutes, displaying the utmost self-importance. At length he rang the bell, and upon the waiter's appearance, gave him an order nearly as follows: 'Waiter, I am a man of few words, and don't like to be continually ringing the bell and disturbing the house; I'll thank you to pay attention to what I say:' 'the waiter replied, 'Yes Sir.' 'In the first place, bring me a glass of brandy and water, cold, with a little sugar and a tea spoon; wipe down this table, throw some coals on the fire, and sweep up the hearth; bring me a couple of candles, pen, ink, and paper, some wafers, a little sealing wax, and let me know what time the post goes out; tell the hostler to take care of my horse, dress him well, and let me know when he is ready to feed; order the chamber maid to prepare me a good bed, take care that the sheets are well aired, a clean night cap, and a glass of water in my room.

Send the boy with a pair of slippers that I can walk to the stable in; tell him I must have my boots brought into the room to night, and that I shall want to be called at five in the morning: ask your mistress what I can have for supper; tell her I should like a roast duck, or something of that sort: desire your master to step in, I want to ask him a few questions.' The waiter answered, 'Yes, Sir,' and then went to the landlord, and told him a gentleman in the parlour wanted a great many things and among the rest he wanted him, which was all he could remember.

---

*Good Advice.*—'Quit your pillow and go about your business, if you have any—is its first injunction; if not seek some. Let the sun's first beams shine on your head in the morning, and you shall not want a good hat to defend you against its scorching rays at noon. Earn your breakfast before you eat it, and the sheriff shall not deprive you of your supper. Pursue your calling with diligence, and your creditor shall not interrupt you. Be temperate, and thy physician shall look in vain for your name on his daybook.'

*Amphibious Animals of Adam's Race.*—The town of Tscharkaskay, in Asiatic Russia, situated beside the river Don, which, like the Nile, rises in the course of the spring from fifteen to eighteen feet, is described in Clark's travels, in the manner here following: 'The appearance of Tscharkaskay, as the traveller approaches it on the river, affords the most novel spectacle. The entrance is by broad canals, which intersect it in all parts. On either side, wooden houses built on piles, appear to float upon the water, to which the inhabitants pass in boats, or by narrow bridges only two planks wide, with posts and rails, for running a causeway to every part of the place. As we sailed into the town, we beheld the

younger part of the inhabitants upon the house-tops, sitting on the ridges of the sloping roofs. On our approach, children leaped from the windows and doors, like so many frogs, into the water, and in an instant were seen swimming about our boat. Every thing seemed to announce an amphibious race: not an inch of dry land was to be seen: and, in the midst of a very populous metropolis, at least one half of the citizens were in the water, and the other in the air.

---

*Historical Curiosity.*—During the troubles in the reign of Charles I. a country girl came to London in search of a place as a servant maid, but not succeeding, she applied herself to carrying out beer from a brew house, and was one of those called tub women. The brewer, observing a well looking girl in this low occupation, took her in his own family as a servant, and after awhile married her; but he died while she was yet a young woman, and left a large fortune. The business of the brewery was dropped, and the young woman was recommended to Mr. Hyde, as a gentleman of skill in law, to settle her husband's affairs. Hyde (who was afterwards the Earl of Clarendon) finding the widow's fortune very considerable, married her. Of this marriage there was no other issue than a daughter, who was afterwards the wife of James II. and mother of Mary and Anne, Queens of England.

*Anecdote of the Temple Clock.*—Some years ago a new clock was made, to be placed in the Temple Hall, the clock maker was desired to wait on the benchers of the Temple, who would think on a suitable motto to be placed on the clock. He applied several times without getting the desired information, as they had not determined on the inscription. Continuing to importune them, he at last came when the old benchers had just sat down to dinner. The workman again requested to be informed of the motto; one of the benchers, who thought the application ill-timed, hastily replied, 'go about your business.' The mechanic taking this for an answer to the question, went home and inscribed it at the bottom of the clock, and placed it in the Temple: but to the great surprise of the benchers, who, considering the circumstance, agreed that accident had produced a better motto than any they could think of: hence ever since, the motto has continued to remind the lawyers, to 'Go about their business.'

---

*Solitude and Company.*—The man who has learned to live alone, feels his spirits enlivened whenever he enters into company, and takes his leave without regret—but those who have been accus-

to be to a continual succession of company, experience in company no elevation of spirits, nor any greater satisfaction, than what the man of retired life finds in his chimney corner!

---

The person who in conversation delights in saying uncivil and disobliging things out of mere wantonness, and for the sake of enjoying the confusion and distress of the object of his remarks, or the butt of his ridicule, is fit for no society but that of savages, and no office but that of hangman.

---

The man who *chuckles* and exults at perceiving the embarrassment of a public speaker, who feels no pain in beholding any awkward or unbecoming exhibitions of meritorious timidity, and who has no sympathy for the feelings of justly offended female delicacy, possesses a bad heart. Form no friendship with a character of that description.

---

True politeness is nothing more than the practice of good nature in the little occurrences of social intercourse according to rules adopted by common consent in good and genteel society. It has the happiness of others in view, and endeavours to make companions pleased with themselves as well as their company.

#### PETER PINDARICS.

*The Auctioneer and the Lawyer.*

A city auctioneer, one Samuel Stubbs,  
Did greater execution with his hammer,  
Assisted by his puffing clamour,  
Than Gog and Magog with their clubs,  
Or that great Fee-fa-fum of war,  
The Scandinavian Thor,  
Did with his mallet, which (see Bryant's  
Mythology) fell'd stoutest giants:—  
For Samuel knock'd down houses, churches,  
And woods of oak, and elm and birches,  
With greater ease than mad Orlando  
Took the first tree he laid his hand to.

He ought, in reason, to have raised his own  
Lot by knocking others' down;  
And had he been content with shaking  
His hammer and his hand, and taking  
Advantage of what brought him grist, he  
Might have been as rich as Christie:—

But somehow when thy midnight bell, Boy,  
Sounded along Cheapside its knell,  
Our spark was busy in Pall-mall  
Shaking his elbow—  
Marking, with paw upon his mazzard,  
The turns of hazard;  
Or rattling in a box the dice,  
Which seem'd as if a grudge they bore  
To Stubbs: for often in a trice,  
Down on the nail he was compell'd to pay  
All that his hammer brought him in the day,  
And sometimes more.

Thus, like a male Penelope, our wight,  
What he had done by day undid by night  
No wonder, therefore, if, like her,  
He was beset by clamorous brutes,  
Who crowded round him to prefer  
Their several suits.

One Mr. Snipps, the tailor, had the longest  
Bill, for many suits—of raiment,  
And naturally thought he had the strongest  
Claim for payment.  
But debts of honour must be paid,  
Whate'er becomes of debts of trade;  
And so our stilish auctioneer,  
From month to month throughout the year,  
Excuses, falsehoods, pleas alleges,  
Or flatteries, compliments, and pledges.  
When in the latter mood one day,  
He squeezed his hand, and swore to pay.—  
“But when?”—“Next month.—You may depend on't,  
My dearest Snipps, before the end on't;—  
Your face proclaims in every feature,  
You would'nt harm a fellow-creature—  
You're a kind soul, I know you are, Snipps.”  
“Ay, so you said six months ago;  
But such fine words, I'd have you know,  
Butter no parsnips.”

This said, he bade his lawyer draw  
A special writ,  
Serve it on Stubbs, and follow it  
Up with the utmost rigour of the law.

This lawyer was a friend of Stubbs;  
This is to say,  
In a civic way,  
Where business interposes not its rubs;  
For where the main chance is in question,  
Damon leaves Pythias to the stake,  
Pylades and Orestes break,  
And Alexander cuts Hephæstion;  
But when our man of law *must* sue his friends,  
Tenfold politeness made amends.

So when he meets our auctioneer,  
Into his outstretch'd hand he thrust his  
Writ, and said, with friendly leer,  
"My dear, dear Stubbs, pray do me justice:  
In this affair I hope you see  
No censure can attach to me—  
Don't entertain a wrong impression;  
I'm doing now what must be done  
In my profession."——  
"And so am I," Stubbs answer'd with a frown,  
So crying "Going---going---going---gone!"  
He knock'd him down!——

*The Gouty Merchant and the Stranger.*

IN Broad street buildings, on a winter night,  
Snug by his parlour fire a gouty wight  
Sate all alone, with one hand rubbing  
His leg roll'd up in fleecy hose,  
While t'other held beneath his nose  
The Public Ledger, in whose columns grubbing,  
He noted all the sales of hops,  
Ships, shops, and slops,  
Gum, galls, and groceries, ginger, gin,  
Tar, tallow, turmerick, turpentine, and tin.

When, lo! a decent personage in black  
Enter'd, and most politely said --  
"Your footman, sir, has gone his nightly track,  
To the King's Head,  
And left your door ajar, which I  
Observed in passing by,  
And thought it neighbourly to give you notice."

"Ten thousand thanks--how very few get,  
 In time of danger,  
 Such kind attentions from a stranger!  
 Assuredly that fellow's throat is  
 Doom'd to a final drop at Newgate,  
 He knows, too, the unconscionable elf,  
 That there's no soul at home except myself."  
 "Indeed!" replied the stranger, looking grave;  
 "Then he's a double knave.  
 He knows that rogues and thieves by scores  
 Nightly beset unguarded doors;  
 And see how easily might one  
 Of these domestic foes,  
 Even beneath your very nose,  
 Perform his knavish tricks--  
 Enter your room as I have done,  
 Blow out your candles--*thus*--and *thus*,  
 Pocket your silver candlesticks,  
 And walk off--*thus*."--

So said--so done--he made no more remark,  
 Nor waited for replies,  
 But march'd off with his prize,  
 Leaving the gouty merchant in the dark.

*Vicissitudes of Fortune.*--There are now living in Hampstead two individuals, in whose situation, time, and the crosses and changes which are constantly taking place in this life, have produced a singular reverse. The one is a gentleman, highly respected, and keeping his carriage, who had formerly filled the humble situation of a porter; and the other is a person who fills the office of groom in the service of this very gentleman, who had been his own porter.--Such are the contrasts produced by wild extravagance and prudent frugality.

A certain Surgeon Dentist of this city, who is not quite a span for Big Dick, was called upon by a person of great maxillary dimensions, for his assistance to dislodge a tooth, which had begun to raise a mutiny among his nerves. The patient being seated on the floor, so as to accommodate his length to that of the doctor, began to open his head, nearly in manner and form of an old fashioned fall-back chase; and the astonished operator, who stood before him, fearing there might be a second edition of Jonah, exclaimed, with terror in his countenance, 'you need

not extend your jaws any further, for I intend to stand on the *outside* while I extract the tooth.'

---

*Qualifications for Congress.*—'Why do you not present yourself as a candidate for Congress?' said a lady the other day to her husband, who was confined to his chair by the gout. 'Why should I, my dear?' replied he; 'I am not qualified for the station.' 'Nay but I think you are,' returned the wife; 'your language and action are truly parliamentary. When *bills* are presented, for instance, you either order them to be laid on the table, or you make a motion to *rise*; though often out of *order*, you are still *supported* by the *chair*; and you often poke your nose into *measures* which are calculated to destroy the *constitution*.'

---

A sailor was lately at a certain chapel in Boston, the parson, observing that he looked rather serious, approaching asked him if he felt any change? The sailor put his hand in his pocket, and said he was very sorry, but he had not a cent.

---

*Humble Merit.*—When Michel Adamson, an eminent French naturalist, was chosen a member of the Institute, he answered, that he could not accept of the invitation, 'as he had no shoes.'

---

*Johnson's Dictionary.*—When Dr. Johnson had completed his Dictionary,—which had quite exhausted the patience of Mr. Andrew Millar, his bookseller, the latter acknowledged the receipt of the last sheet, in the following note :

'Andrew Millar sends his compliments to Mr. Samuel Johnson, with the money for the last sheet of the copy of the Dictionary, and thanks God he has done with him.'

To this rude note, the doctor returned the following smart answer :

'Samuel Johnson returns his compliments to Mr. Andrew Millar, and is very glad to find (as he does by his note) that Andrew Millar, has the grace to thank God for any thing.'

---

In the first war of Silesia, Frederick being desirous of making, in the night time, some alterations in his camp, ordered that under pain of death, neither fire nor candle should be burning in the tents after a certain hour. He went round the camp himself, to see that his orders were obeyed; and, as he passed by Captain Zieten's camp, he perceived a light. He entered, and found the Captain sealing a letter, which he had just finished writing to his wife, whom he tenderly loved. 'What are you doing there?'

said the king; 'Do you not know the orders;' Zieten threw himself at his feet, and begged mercy, but he neither could nor attempted to deny his fault. 'Sit down,' said the king to him, 'and add a few words I shall dictate.' The officer obeyed, and the king dictated; 'To-morrow I shall perish on a scaffold.' Zieten wrote it, and he was executed the next day.

---

*Ingenious Spy.*—It was customary with Marshal Bassompierre, when any of his soldiers were brought before him for heinous offences, to say to them, 'Brother, *you* or *I* will certainly be hanged;' which was a sufficient denunciation of their fate. A spy, who was discovered in his camp, was addressed in this language; and next day, as the wretch was about to be led to the gallows, he pressed earnestly to speak with the marshal, alleging that he had somewhat of importance to communicate. The marshal being made acquainted with his request, said, in his rough manner, 'It is always the way of these rascals; they pretend some frivolous story, merely to reprieve themselves for a few moments; however, bring the dog hither.' Being introduced, the marshal asked him what he had to say? 'Why, my lord,' said the culprit, 'when I first had the honour of your conversation, you were pleased to say, that either you or I should be hanged; now I am come to know whether it is your pleasure to be so, because, if *you* won't, *I* must, that's all.' The marshal was so pleased with the fellow's humour, that he ordered him to be released.

---

*Gipsy Equivoque.*—Some young ladies who had been taking a walk, were accosted by a gipsy woman, who, for a small reward, very politely offered to show them *their future husbands' faces* in a pool of water that stood near. Such an offer was too good to be refused, and on paying the stipulated sum, the ladies hastened to the water, each in anxious expectation of getting a glance of the 'beloved;' but lo! instead of beholding the 'form and face,' they fondly anticipated, they were surprised to see only their own rosy cheeks and sparkling eyes glancing from below. 'Sure you are mistaken, woman,' exclaimed one of them, 'for we see nothing but our own faces in the water.' 'Very true, Mem,' replied the sagacious fortuneteller, 'but these will be your *husbands' faces* when you are married.'

---

*Repartee.*—M. Lalande dined one day at the house of Recamier, the banker; he was seated between the celebrated beauty, Madame Recamier, and Madame de Stael, equally distinguished for her wit. Wishing to say something agreeable to the ladies,

labourer, with all his apparent want, frequently enjoy more real happiness than the rich miser in the midst of his abundance?--- The latter is continually tormented with the fear of losing his superfluous treasures: eager of adding to his store, he even denies himself common necessaries, and leads a miserable life; whilst the former, unmindful of future wants, is heard to sing over his scanty meal. Contentment is a most valuable blessing. It is the sovereign medicine of afflictions. By bearing them with patience and resignation, we in a great measure lessen their weight, and are better prepared to withstand any future adverse stroke of fortune. But instead of alleviating, we only add to our troubles by repining. Often do we wantonly contrive to be our own tormentors, by looking with an envious, ill-natured eye, upon the condition of others, or by contemplating only the dark side of our own. Often, too often do we reject our own happiness, by neglecting every substantial blessing that is within our reach; and court misery, by creating imaginary wants to ourselves, and hunting after some fugitive enjoyment, which, like a shadow, always flies from us in proportion to the swiftness with which it is pursued.

---

*On entrance into an estate or trade.*—In the first entrance into thy estate, keep a low sail, thou mayest rise with honour, but canst not decline without shame: He that begins as his father ended, shall end as his father began. Let the trader consider how hard 'tis to get a penny honestly, and how easy 'tis to spend a dollar; that he is not sure all he gets will abide by him, but sure and certain that all that goes out for subsistence will never return again.

He that has the patience to attend small profits may quickly grow to thrive and purchase; for they be easier to accomplish, and come thicker. He that from every thing collects something, shall in time gain much.

---

*The ornaments of youth.*---Among all the accomplishments of youth, there is none preferable to a decent and agreeable behaviour among men, a modest freedom of speech, a soft and elegant manner of address, a graceful and lovely deportment, a cheerful gravity and good humour, with a mind appearing ever serene under the ruffling accidents of human life: add to this a pleasing solemnity and reverence when the discourse turns upon any thing sacred and divine, a becoming neglect of injuries, a hatred of calumny and slander, a habit of speaking well of others, a pleasing benevolence and readiness to do good to mankind, and special compassion to the miserable; with an air and countenance, in a natural and unaffected manner, expressive of all these natural qualifications.

*Sir Richard Steele* — An intimate acquaintance of the late Sir Richard Steele dined with him one day after he had been lately married, and just set up his chariot; his lady two or three times at dinner, asked him if he used the chariot that afternoon? to which he only answered, 'oysters, when the table cloth was taken away;' she said, 'well my dear, I'll take the chariot!' to which he again replied, 'oysters my dear! she dropped a curtsey, confessed she was in an error, and stood reproved. On her retiring, sir Richard's friend thus addressed, 'as absurd as your answer might seem to others, I know your manner so well, that I am assured there is some moral instruction in your word 'oysters;' as it must be some gentle humorous reproof, do me the favour to let me into the secret of it? 'You know,' says sir Richard, 'we have just set up a chariot, and being apprehensive it might have such an effect on my wife's heart, that she might inconsiderately talk of it too much, thereby betraying a weakness of mind I would gladly prevent, I told a story of a young fellow who had lately set up an equipage, and had always the vanity to be talking of it;' which was as follows: Ned Sparkish on the death of his elder brother, left the attorney to whom he was clerk, set up an equipage, and commenced *petit maitre*; he was one day walking with some gentlemen in the mall, when one of them asked him to be of their party to dine at a famous eating house at Charing-Cross; 'with all my heart, my dear,' 'I'll step to my servant and give some orders about my chariot, and be with you in a moment!' On this another gentleman said, 'how can you ask that coxcomb to be with us, we shall hear of nothing but his chariot; I'll lay half a dozen of French wine, he talks of it within ten minutes after he comes into the room!' 'As I think that impossible,' says another, 'it is a bet.' Ned by this time joined them again, and they went to Lockles: they were scarce in the room, when the gentleman who laid the wager proposed having some oysters before dinner, as a whet; but at the same time feared there were none fresh enough at that end of the town, and proposed to send to Billingsgate for some; it was objected that it would take too much time, otherwise they approved of his motion? 'nay,' said Sparkish, 'let that be no objection, my chariot is at the door, and I'll despatch Tom away with it immediately, and he may bring the oysters in half an hour at farthest.' 'You see,' says sir Richard, the intent of this story, on how absurd a foundation soever it may be built; I told it my wife as a family piece of instruction, and you see that she has good sense enough, <sup>has</sup> <sup>versy</sup> the mention of oysters, to see and confess her error.'
